To whom it may concern;

This is a letter of recommendation for Protect n' Shine, the Stainless Steel Protectant. We have been working with this organization for over a year and have been pleased at the service there business has provided for our campus. The stainless steel protectant has been an ideal solution on our stainless partitions and elevators; keeping them beautiful at all times. I would highly recommend this product to anyone who is constantly dealing with the challenges that stainless steel brings to any facility.

Sincerely,

Samuel Robertson
Associate Director, University of Utah
